

## LOAD CELL H8C4

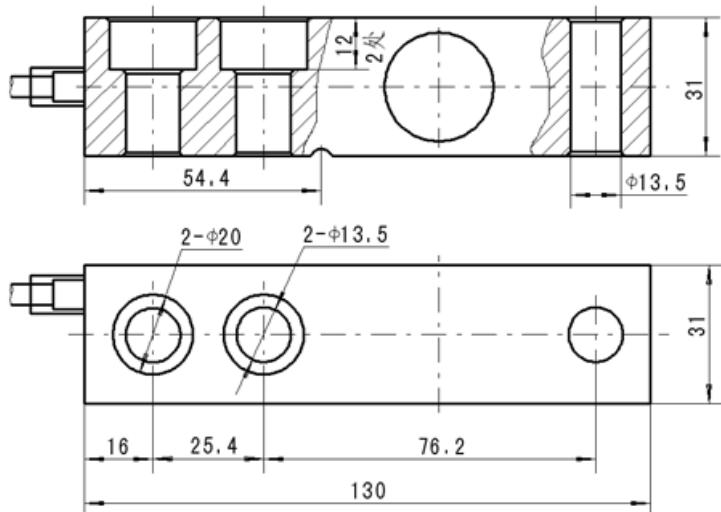

### Alloy Steel construction beam load cell

- Adhesive sealed
- Integrated structure and easy installation
- Suitable for pallet scales, platform scale and other electronic weighing devices.

### Specification

|                                   |               |                      |
|-----------------------------------|---------------|----------------------|
| Capacity                          | $t$           | 1.0                  |
| Output Sensitivity                | ( mv/v)       | $2.0 \pm 0.002$      |
| Combined Error                    | ( %FS)        | 0.02                 |
| Creep                             | ( %FS/30min)  | 0.02                 |
| Temperature effect on Sensitivity | ( %FS/10°C)   | 0.02                 |
| Temperature effect on Zero        | ( %FS/10°C)   | 0.02                 |
| Input resistance                  | ( $\Omega$ )  | $350 \pm 3.5$        |
| Output resistance                 | ( $\Omega$ )  | $351 \pm 2$          |
| Insulation resistance             | ( $M\Omega$ ) | $\geq 5000$ ( 50VDC) |
| Zero balance                      | ( %FS)        | $\pm 1.0$            |
| Temperature compensation range    | ( °C)         | -10 ~ +40            |
| Allowed temperature range         | ( °C)         | -35 ~ +65            |
| Recommended excitation voltage    | ( V)          | 5 ~ 12 ( DC)         |
| Maximum excitation voltage        | ( V)          | 18 ( DC)             |
| Safe load limit                   | ( %FS)        | 150                  |
| Ultimate load limit               | ( %FS)        | 200                  |

### Dimension mm (inch)

### Cable Wiring :

4-wires cable with shielded, 2m cable length
